## PROFESSIONAL SUMMARY

Results-driven Computer Science student and Full-Stack Developer with a strong foundation in Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), and scalable MERN stack architecture. Proven ability to architect distributed systems concepts and high-performance web applications. Eager to bring strong problem-solving capabilities and a user-first engineering mindset to a Software Engineering Summer Internship at Google, contributing to robust, global-scale digital solutions.

## EDUCATION

|                                                                                          |                        |
|------------------------------------------------------------------------------------------|------------------------|
| <b>Institute of Engineering and Technology (IET)</b>                                     | Lucknow, Uttar Pradesh |
| Bachelor of Technology (B.Tech) in Computer Science and Engineering (CSE)                | 2024 – Present         |
| CGPA: 9.14 — <i>Coursework: Data Structures &amp; Algorithms, Operating Systems, OOP</i> |                        |
| <b>M. V. Public School</b>                                                               | Bhadohi, Uttar Pradesh |
| Class XII (CBSE)                                                                         | 2023                   |

## TECHNICAL SKILLS

- **Programming Languages:** Java, C/C++, JavaScript, HTML5, CSS3
- **Backend & Databases:** Node.js, Express.js, MongoDB, RESTful APIs
- **Frameworks & Tools:** React.js, Tailwind CSS, Git, GitHub, VS Code, Postman
- **Core Competencies:** DSA, Object-Oriented Programming (OOP), Operating Systems (OS), Software Design, Concurrency, Synchronization, Distributed Architecture Concepts

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Cognexon Solutions</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Mar 2026 – May 2026 |
| <i>Full-Stack Developer Intern</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                     |
| <ul style="list-style-type: none"><li>• Developed and optimized responsive, scalable web applications utilizing React and Node.js, implementing robust OOP and software design patterns.</li><li>• Engineered asynchronous RESTful APIs to facilitate secure data exchange, ensuring efficient thread synchronization and concurrency across active user sessions.</li><li>• Collaborated within an agile cross-functional team to troubleshoot architectural bottlenecks and deliver high-performance software solutions.</li></ul> |                     |

### Google Community

*Graphics Designer*

- Conceptualized and designed engaging, high-fidelity visual assets for community events and digital marketing campaigns.
- Ensured strict adherence to brand guidelines and visual consistency across all accessible media platforms.

## PROJECT EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CSED Placement Portal</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <ul style="list-style-type: none"><li>• Architected the official web application for the CSE department to automate and scale the collection of placement details and administrative data.</li><li>• Engineered dynamic data modules for automated “no dues” clearance, utilizing optimized data structures to manage centralized student achievement tracking.</li><li>• Refined and modernized complex UI layouts, aligning specific achievement cards and optimizing component usability for concurrent administrative users without a complete redesign.</li></ul> |

### NewsForge

- Built a full-stack news aggregation platform designed to concurrently process, synchronize, and deliver real-time data feeds from distributed sources with minimal latency.

### CarbonWise

- Developed an analytical platform utilizing complex algorithmic logic to calculate vehicle emissions and systematically detect potential greenwashing in manufacturer claims.

### ClearView

- Engineered an adaptive, accessibility-first website interface specifically tailored to accommodate and enhance the browsing experience for color-blind users.
